A Milton Bradley Company

Journey to the icy waters beneath the North Pole. As commander of a powerful and highly maneuverable submarine, you must rescue the survivors of an ill-fated expedition.

Seek out the survivors on your sonar screen and pilot your sub to their rescue! To complete your mission, you must avoid deadly mine fields, enemy submarines and the terror of the maelstrom! Monitor your oxygen supply carefully and hurry! Lives are at stake!

Setting up

Setting up

- Make sure the console power cord is plugged into a 120 volt AC 60 cycle electrical outlet.
- Check to be sure the plug for the built-in control panel is firmly seated in the control panel outlet on the right.
- **MAKE SURE THE CONSOLE IS TURNED OFF BEFORE INSERTING THE CARTRIDGE.** Insert the cartridge into the cartridge slot with the label side up. Be sure it is firmly inserted to the guideline marked on the cartridge.
- Insert the screen overlay behind the tabs at the top and bottom of the screen.
- Turn the OFF/ON/VOLUME CONTROL to the ON position (clockwise). You will see the Vectrex title for a few seconds, then the name of the game.
- Adjust the volume control to the desired listening level.

Polar Rescue Controls

Polar Rescue is played with the built-in control panel only. The functions of the controls are:

How to Play

Player Selection

Polar Rescue can be played as either a 1 or 2 player game. When **PLAYER 1** appears on the screen, press

Button 1 once to switch to a two-player game.

PLAYER 2 will then be displayed on the screen.

When played as a two-player game, use only the built-in control panel and simply take turns with the controls. You can return to a single player game by pressing Button 1 again before starting game play.

Skill Level Selection

You can begin Polar Rescue at any of four different skill levels. Level 1 is the least difficult; Level 4 is the most difficult. To select the skill level, press Button 2. This option allows you to skip past levels you have already mastered.

Starting Game Play

Once you have selected the number of players and the skill level, press Button 4 to begin your rescue mission!

Game Play

Your goal in Polar Rescue is to successfully maneuver your submarine in the icy waters beneath the North Pole and rescue the survivors of an ill-fated mission. You'll battle enemy subs, blow up and avoid mine fields and ice chunks, even experience the powerful maelstroms—turbulent underwater whirlpools that throw you off course. There's no escape from a maelstrom... you get out only when it throws you out of its

powerful center! As you become more proficient and advance to higher skill levels, your sub will have to travel further to get to the survivors and you may encounter more and more enemy subs!

Instrument Panel

Sonar Display

The sonar display at the bottom center of the screen is used to locate the survivors, maneuver around obstacles and detect enemy subs. Your sonar range is about twice as far as you can see out of your viewing window. Your viewing window is represented by the 'V' portion of the sonar screen.

All obstacles within your sonar range are represented by blips of light that reach full brightness when passed by the rotating scanning arm of sonar, and then reduce in brightness. There is one exception to this rule: a blip representing an enemy sub always remains at *full* brightness. This is how you'll be able to tell the difference between an enemy sub and another object.

The survivors' pod is represented on the sonar display by an *arrow* rather than a blip of light. The brightness of this arrow will pulsate and you will hear a series of beeping sounds that will get faster as you get closer to the survivor's pod. To head toward the survivors, use the joystick and Buttons 2 and 3 to maneuver your sub so that the arrow appears at the top center area of the sonar screen.

Oxygen Supply

At the beginning of the game, you are provided with a full tank of oxygen. During the game, you constantly use oxygen. The faster you travel, the more oxygen you use... so keep a sharp eye on your oxygen supply on the instrument panel. Oxygen may be replenished when you destroy enemy subs (see Enemy Subs). If you run out of oxygen, you will lose a sub.

Speed and Direction

You can control the speed and direction of your submarine's movement with Buttons 2 and 3. Press and hold Button 3 to increase speed in a *forward* direction. Press and hold Button 2 to increase your speed in a reverse direction. If you release Buttons 2 and 3, your sub will soon come to a standstill. By pressing Buttons 2 and 3 *at the same time*, you can *maintain* your current speed. Your speed and direction are shown on the instrument panel—the center line indicates no movement, forward speeds are to the right and reverse speeds are to the left.

Use your joystick to maneuver your sub—push it forward to dive deeper into the water, push backward to surface, push to the right or left to change the direction of your heading.

Obstacles

MINES

Mines are stationary ... but very sensitive as you draw close. If you pass mines too closely, they will explode and destroy you instantly! You can shoot and destroy a mine with your torpedoes, but if you are too close to it when you shoot, you'll get damage points. (see

Damage Points).

ICE CHUNKS

If you collide with an ice chunk, damage points are collected (see Damage Points). The number of points against you is determined by the speed of the collision. If you 'bounce' off an ice chunk, your direction of travel is reversed. Watch out for ice chunks directly overhead ... if your sub sits under one, it will continuously 'bonk' on top of your vessel, causing continuously increasing damage. You can disengage yourself from this 'bonking trap' by simultaneously diving and moving either forward or backward. You can also shoot and break up ice chunks with your torpedoes.

MAELSTROMS

Maelstroms—turbulent underwater whirlwinds—always throw you off course. There's no way to avoid a maelstrom. All you can do is wait until it hurls you out of its powerful swirl!

ENEMY SUBS

Each enemy sub has five torpedoes, so it can fire at you only five times. When *you* shoot and destroy an enemy sub, you receive all the enemy's torpedoes remaining at the time you fired the hit. You also receive extra oxygen! Plan your strategy and shoot enemy subs when your oxygen supply and your torpedoes are low, as shown on your instrument panel.

If an enemy sub becomes 'aggressive', you will enter into Battle Mode (see Battle Mode). An enemy sub will become aggressive if you shoot one or more of your torpedoes at it while it is in your sonar range. An enemy sub can also become aggressive if you are traveling at high speed within its range... or even if he sights you in range without any provocation at all!

Damage Points

Damage points are collected when objects are struck by your sub. The number of points increases with the speed of your sub on impact. Damage points are also collected when objects explode within close range of your sub and when you shoot a mine at close range. As you collect damage points, some of your sub's functions become non-operational. These are as follows:

Damage Points Resulting Damage

0-10	No damage
10-19	You lose your upper left torpedo tube
20-29	You lose your upper right torpedo tube
30-39	You lose your lower left torpedo tube

NOTE: If you have 40 or more damage points, it is impossible to dock with the survivors' pod.

40-49	You lose your lower right torpedo tube
50-59	You lose your survivors' pod Arrow on the sonar screen
60-69	You lose your Sonar Display
70-79	You lose control of speed
80-89	You completely lose your engine speed and you're dead in the water
90-99	You lose your sub

Your crew repairs the damage over time, so your damage points will get lower if you are able to stay alive.

Battle Mode

Battle Mode is entered whenever there is at least one aggressive sub in your sonar range (see Enemy Subs). While in Battle Mode, the words 'BATTLE MODE' will appear on your instrument panel, and your maximum speed is greatly reduced. An aggressive enemy sub will try to destroy your sub but will *not* fire until he is in front of you *and* is pointing at you. Be extra alert in Battle Mode because the enemy sub can fire even if he is too far in front of you for you to see him from your viewing window. Aggression is cancelled when an enemy sub fires ... but it may be re-triggered immediately, so be careful! Docking with the survivors' pod is not possible while in Battle Mode (see Docking Mode).

Docking Mode

Docking Mode enables you to successfully reach the survivors. You enter Docking Mode when the survivors' pod is in sight of your sub. While in Docking Mode, the words 'DOCKING MODE' will appear on your instrument panel and a new sonar display, will replace the normal sonar display. The new sonar display, which shows a 'cross' and a 'sight', will guide you in this very sensitive docking maneuver.

In order to successfully dock with the survivors' pod, you must line up the 'cross' in the exact center of the 'sight' ... **WHILE MAINTAINING A VERY SLOW SPEED.** If you are successful, you will see a special docking sequence on the screen during which the survivors will return to your ship.

The game will then continue with a new search and rescue mission.

Number of Submarines

In each game you start with 5 submarines. A bonus sub is awarded when you score 25,000 points.

Scoring

Points are awarded as follows:

Docking	5,000 points
Destroying an Enemy Sub	1,000 points
Destroying an Enemy Torpedo	750 points
Destroying a Mine	500 points
Destroying an Ice Chunk	275 points

High Score Memory

As long as your machine is on with the Polar Rescue cartridge in place, the high score is retained. Once the machine is turned off and the cartridge is removed, the high score is lost. To check the highscore, press the Reset Button on the console.

Restarting the Game

To restart after a completed game with the same number of players, simply press any of the buttons on the control panel.

90 Day Limited Warranty

This Video Game Cartridge is warranted by General Consumer Electronics, Inc. to the original consumer purchaser in the U.S.A. for a period of 90 days from the original purchase date under normal use and service against defective workmanship and materials. ANY IMPLIED WARRANTIES ARE ALSO LIMITED IN DURATION TO THE NINETY (90) DAY PERIOD FROM THE ORIGINAL PURCHASE DATE. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

This warranty is void if the GCE Video Game Cartridge has been damaged by accident, unreasonable use, neglect, misuse, abuse, improper service, modification, subject to commercial use or other causes not arising out of defects in workmanship or materials and is limited to electronic and mechanical parts contained in the cartridge.

GENERAL CONSUMER ELECTRONICS, INC. SHALL NOT BE LIABLE FOR LOSS OF USE OF THE VIDEO GAME CARTRIDGE OR OTHER INCIDENTAL OR CONSEQUENTIAL COSTS, EXPENSES OR DAMAGES INCURRED BY THE PURCHASER RESULTING FROM BREACH OF ANY EXPRESS OR IMPLIED WARRANTIES ON THE VIDEO GAME CARTRIDGE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

During the warranty period, if found to be defective due to workmanship or materials, the GCE Video Game Cartridge will at the option of General Consumer Electronics, Inc. be repaired or replaced with a new or reconditioned GCE Video Game Cartridge without charge for parts or labor when returned by Purchaser with proof of purchase date, shipped prepaid to General Consumer Electronics, Inc. at the following address:

General Consumer Electronics, Inc.

233 Wilshire Boulevard
Santa Monica, California 90401

In the event that your GCE Video Game Cartridge is replaced, the warranty on the replacement will be ninety (90) days from the date of its return to you.

Order Form for Replacement Screen Overlays

Additional screen overlays may be ordered by completing this form and mailing it with your check or money order for \$2.00 each. Address check or money order to:

**GCE, Vectrex Screen Overlays, P.O. Box 8123,
San Francisco, CA 94128**

Please allow 2-3 weeks for delivery. Offer subject to availability.

Note: Separate cartridges are needed for the overlays listed below.
